

Exercise:

Have the following page:

<https://dribbble.com/shots/popular>

Create a solution(automated checks using any framework/programming language) where you need to include the following:

1. Log into the app
2. Go to the dashboard (where 'All' option is selected by default) and click on **Filters**

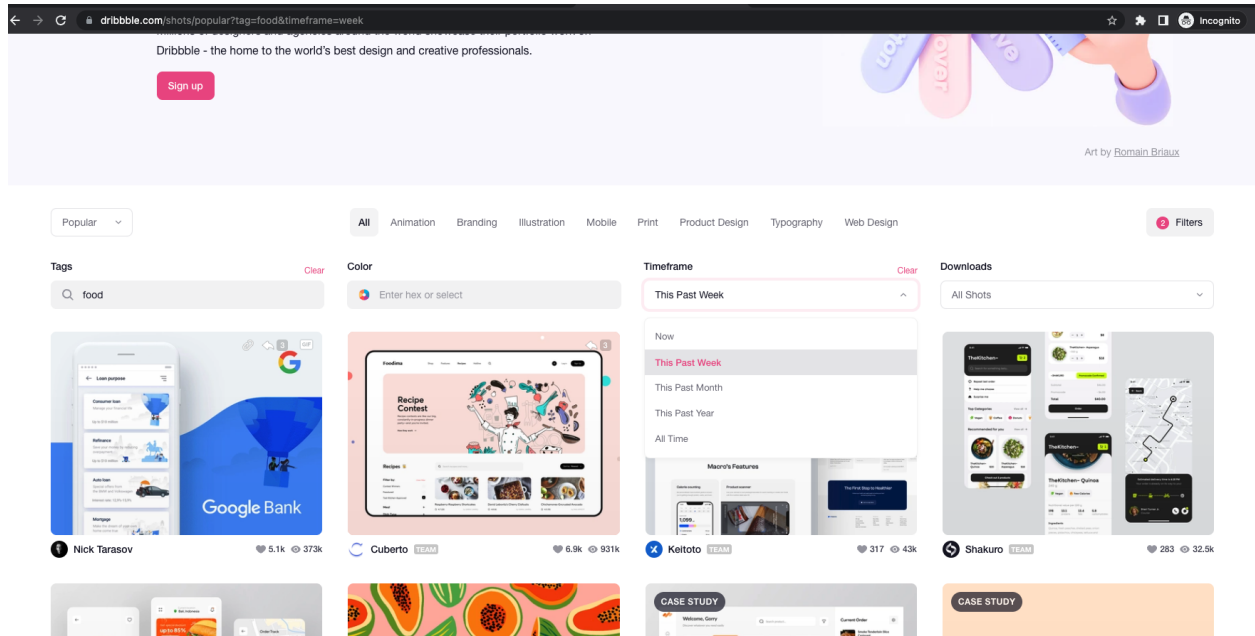

3.Filter by “Timeframe” and select **This Past Week** option and check that dropdown has the option selected

4. Clear “Timeframe” filter and after that go to “**Tags**” filter and search by “**food**” text

5. Verify the result: check only the first row(the first 4 cards- the length)

6.After that hover over the first card and check the presence of the 2 icons from the right corner :**'Save shot'** and **'Like this shot'**

6. Check also the number of likes and the number of views (which is under the card, on the right side)- for the first card
